- Listing in UK Group brochure
- Project management

Why Wind Energy Hamburg?

Offshore wind power continues to flourish on the northern shores of Europe as the continent maintains its position as the world's leading offshore wind market. In 2018 alone, Europe connected over 400 new offshore wind turbines to the grid across 18 projects, taking installed capacity to almost 19GW.

The United Kingdom and Germany drive the market in the region with France, Netherlands, Denmark following with significant developments in the pipeline. This will be our fifth UK Pavilion at the event and we hope to make it our biggest! Exhibiting on a national pavilion offers you the opportunity to showcase your products and services in a dedicated area.

WindEnergy Hamburg boasts over 35,000 visitors from across the globe with over 1,400 exhibitors from 40 countries along the entire project value chain. UK supply chain companies can offer extensive knowledge and experience in the sector, which is widely sought in emerging offshore wind markets. WindEnergy Hamburg is the opportunity to establish business relationships/links in the offshore wind industry, not just with leading developers, but with the entire global supply chain.

Don't miss this chance to engage with key industry representatives / showcase your offering!
